Implementation of Gauss Seidel Power Flow Solution in MATLAB. This is the general program for solution, it has 2 test cases (the 6 and 9 ieee bus systems) but can be accurately used in other power systems, just enter the data in tables , e.g (line & bus). The program computes the admittance matrix  $Y_{bus}$  and computes  $V$  and  $\Theta$  using the Gauss Seidel method, then, the load flows are calculated.
